SILVESTRI

the Art of Custom CALIFORNIA

In business for over 75 years, Silvestri California manufactures mannequins, forms, decoratives, props and fixtures at our 114,000 square foot facility. Our clients include department stores, specialty retailers, design firms, shopping malls, theme parks and the hospitality industry.

We provide quality items in fiberglass, polyurethane foam, resin, papier mache, wood and metal. In addition to our extensive catalogue of products we offer comprehensive custom design and production packages. Working with clients through our in-house design and sculpting studios, we are able to take their visions and develop them into prototypes ready for production.

Along with domestic production in Los Angeles, we also offer you the opportunity to develop import programs for your company. Silvestri California guarantees the quality of all its product, whether domestic or import.

We are dedicated to insuring that all aspects of a project, including design development, prototyping, production and delivery, are handled with the utmost care for your total satisfaction.

On-going research and development of the newest technologies in materials, design and production help keep Silvestri California a leader in the visual merchandising industry.

Please contact us to set up an appointment to meet with one of our sales representatives to review our product line, visit our facility and discuss how Silvestri California can provide you with quality design, product and service.
